Partnership Opportunities 2025

Our Mission

DANENet's mission is to make information technology accessible and affordable through education and services for nonprofit organizations and individuals with barriers.

Our vision is to make Dane County the most connected place for everyone.

What is the Digital Divide?

The gap between those who have access to technology, the internet, and digital literacy and those who do not.

What is Digital Equity?

Is a condition in which all individuals and communities have the information technology capacity needed for full participation in our society, democracy, and economy. Digital Equity is necessary for civic and cultural participation, employment, lifelong learning, and access to essential services.

Why Invest

Your dollars will make a difference when you invest with DANENet:

- Connect low-income individuals and families with technology and digital skills to improve their health, safety, and education by giving them access to online resources.
- Keep Tech Support service prices affordable for over 100 local nonprofit organizations.
